ForestrySA prescribed burns in the Green Triangle Region

ForestrySA will carry out prescribed burning operations in the Green Triangle Region from this week.

Burns are planned for areas north of Nangwarry, to the north-west of Mount Gambier, and near Caroline and Mount Burr.

They will be undertaken by trained ForestrySA fire management staff and patrolled by ForestrySA fire management vehicles.

Residents are advised smoke will be visible in affected forest areas during the burning operations, with significant smoke columns for an hour or two expected at each site.

The burning of native forest areas reduces understory fuel loads, and is used to protect assets and promote species biodiversity.
