RESIDUE BURNING STARTS IN MT LOFTY RANGES

After recent good rains which have made conditions suitable for controlled burning, ForestrySA is to start its annual residue burn program in the Mount Lofty Ranges from tomorrow (Tuesday May 1).

Residents in the area may notice columns of smoke over the next few days as ForestrySA prepares for the re-planting of recently harvested plantations.

Areas scheduled for residue burning include Kuitpo, Second Valley and the Mount Crawford Forest Reserves.

The burn program is an important component of ForestrySA's replanting and fire management activities.
